10-96 Designs Community System is a community software created by us to help our clients get a head start on their online communities. This software is a slowly developing project being solely developed by Sean Isley using, mainly, his own custom written code, along with a few free scripts found online. Read below for the current features list.

Features:

- Fully Functional Register/Login Scripts
- Admin Panel

Manage Site Moderators Manage Paid Members Manage Site News/Updates Mass Comment Users Edit Members Profiles and Information Delete Members

- Member Profiles Custom Content Fields (About / Likes / Dislikes / Music / Poetry) (+3 extra boxes for paid users) Poetry Section is a drop-down select script that dynamically shows the select poetry. Member Pictures Gallery Comment features with smilies Paid users can activate a PHP shout box with smilies User customizable contact information and links to other community sites. Buddy / Enemy Features

- Site is completely private, so no annoying spam or guests to worry about clogging up your site
- Banners page, including a Dynamic Banner script that shows current user count
- Browse/Search features
- Help Page, including a contact form that E-mails all staff with the question/problem

That is most of the current features currently running fully on the 10-96 Designs CS (Community System). As we add more features, they will be compiled to the list. We still have a lot of ideas we wish to incorporate into the system, including, but not limited to:

- Clickable smilies which auto update the text area.
- Member Art Gallery
- Advanced Search feature
- Journal/Blog Feature
- Mass Message Buddies
- Sign in under invisible mode
- Initiate time zone settings for future features (comments, birthdays, etc...)
- Browse Current Birthdays
- Possible Band Profile Features
- Couples Settings
- Report This Profile Feature
- Forum Addition

The CS is currently unavailable for download, as we are restructuring the file-system and back-end before releasing version 1 of our software. Please keep checking back, as we really hope to have it available for download soon. You can see our current running example at <http://brokensaintz.com>
